

SACRED NUMBER
AND GEOMETRY

“From the effulgency of light— the ray of the
ever-darkness— sprung in space the re-
awakened energies; the One from the egg, the
six, and the five. Then the three, the one, the
four, the one, the five— the twice seven, the sum
total. And these are the Essences, the Flames,
the Elements, the Builders, the Numbers, the
Arupa, the Rupa, and the force of divine man—
the sum total.” Secret Doctrine, v. I, Stanza IV from the Stanzas of

Set your Audio to “Mic”

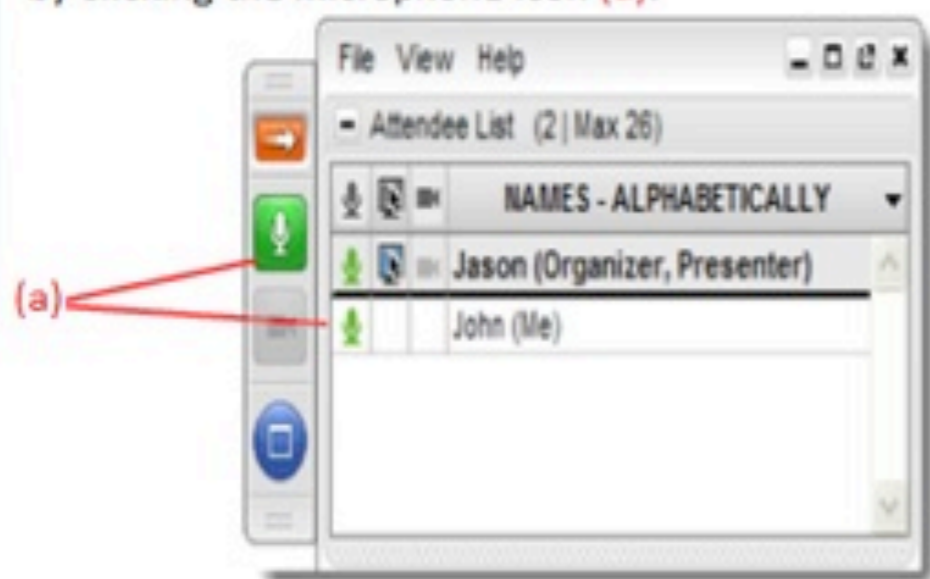

- Please look at your Audio block
 - If you see a Plus sign, press it to expand the block
 - Then you'll see the 2 buttons
 - press the one that says “Mic & Speakers” and you'll get a little microphone so we can hear you better.

Noise Protocols

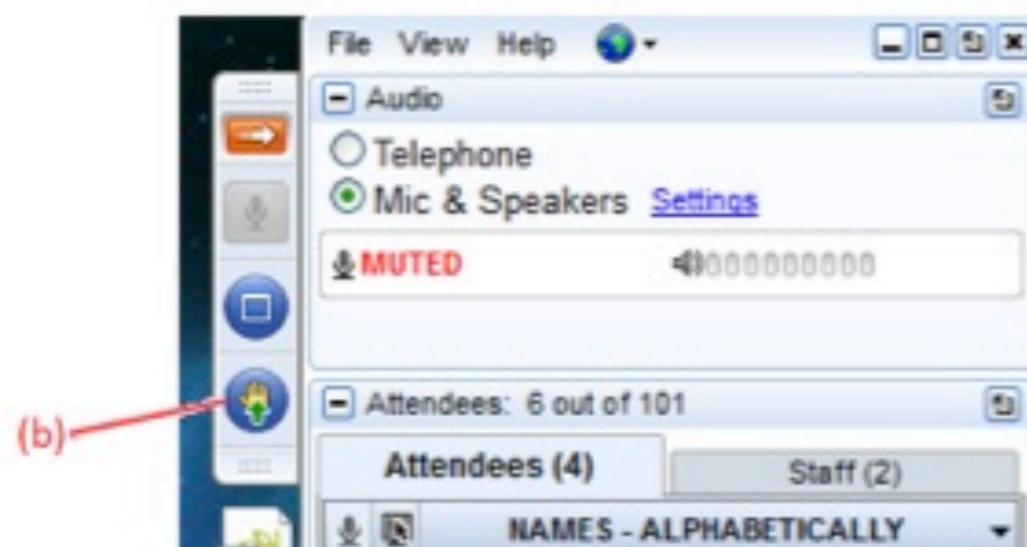

Please keep your audio muted

You can mute/unmute your line from your control panel by clicking the microphone icon (a).

Raise your hand if you have a question

The presenter will pause at designated times to allow attendees to ask questions; if you have one, please raise your hand (b).

Everyone is muted to minimize noise

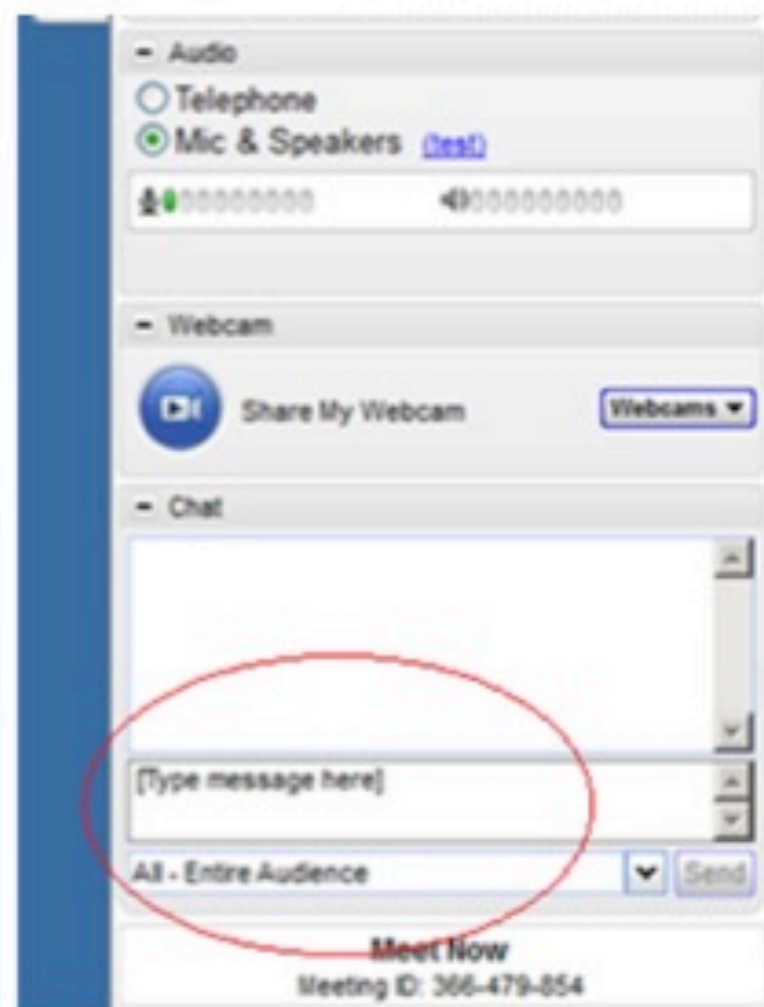

- For questions, please raise your hand
 - Arrow points in direction you want it to go
 - A green up-arrow means your hand is down
 - So a red down-arrow means your hand is up

Please expect a pause after being addressed

- There can be a delay due to internet connections

If you're having problems with echoes

- Mute yourself 1st, see if that helps the problem
- If not, use the questions or message function to alert the staff you are experiencing problems

“All our sense organs function in response to the geometrical or proportional— not quantitative— differences inherent in the stimuli they receive. For example, when we smell a rose, we are not responding to the chemical substances of its perfume, but instead to the geometry of their molecular construction. That is to say, any chemical substance that is bonded together in the same geometry as that of the rose will smell as sweet.” Robert Lawlor from ‘Sacred Geometry’

"Geometry, working with the aid of the imagination, is able to bring about recollection of the eternal ideas of the soul." *Algis Uzdavinys*

“The soul throws its light upward and outward, and the idea, nebulous and faint, emerges into the consciousness of the man. It stands revealed, much as an object stands revealed when the bright beam of a powerful searchlight is thrown upon it. The mind, endeavouring to remain in constant steady conscious contact with the soul, seeing into the higher world through the medium of the “soul's wide-opened eye,” registers the idea with increasing clarity.” ‘Glamour, A World Problem’ by Alice Bailey

Thirty spokes converge upon a single hub;
It is on the hole in the middle that the use of the
cart hinges.

We make a vessel from a lump of clay;
It is the empty space within the vessel that
makes it useful.

We make doors and windows for a room;
But it is the empty spaces that make the room
livable.

Thus while the tangible has advantages
It is the intangible that makes it useful. Lao Tzu

BLIND 118

Marc Chagall

The image features a quote by L. A. Govinda. The text is written in a white, serif font and is centered on a dark blue background filled with numerous small, bright stars. The stars vary in size and brightness, creating a sense of depth and vastness. The quote is enclosed in a light-colored, textured border that resembles aged paper or parchment. The overall aesthetic is contemplative and philosophical.

“The infinity of space and the infinity of consciousness are identical. The way in which we experience space, or in which we are aware of space, is a characteristic of the dimension of our consciousness.” L. A. Govinda

L.A. Govinda

Space is an Entity, and the entire vault of heaven is the phenomenal appearance of that entity... This entity is one and the same as the Cosmic Christ, referred to by St. Paul as the "body of Christ"... The glory of man lies in the fact that he is aware of space and can imagine this space as the field of divine living activity." The Tibetan
