

# Introduction to Esoteric Astrology 2

**Astrology is essentially the purest presentation of occult truth in the world at this time, because it is the science which deals with those conditioning and governing energies and forces which play through and upon the whole field of space and all that is found within that field.**

## 1. Orthodox or Exoteric Astrology:

maps the **PERSONALITY** life.

## 2. Esoteric Astrology:

Is the science of the **SOUL**, of unfolding consciousness, and is used to help us identify what we have to do to..

- a. Purify the **UNCONSCIOUS** (past life negative habits) by studying the **MOON M SIGN**
- b. Integrate and purify the **PERSONALITY** (selfish egocentric) by studying the **SUN N SIGN**
- c. Transform and become **SOUL CONSCIOUSNESS** (wise, loving, inclusive) by studying the **RISING SIGN** (at 9'oclock)

## Questions

1. Moon, can it move thru Vulcan, Neptune, Uranus in one life? **[LH. Yes, unusual]**
2. Is the moon (associated with astral) more influencing in teens? **[Yes]**
3. When we read about the pre-patterns in the Moon or Vulcan **[not Vulcan, it purifies]** etc, it appears like there is only one basic pattern that we bring in? **[Moon shows us the most entrenched/ negative habit-pattern, that is imprisoning the soul]**
4. If a person is on the path, neither the moon or its house is read.. use either Vulcan, Neptune or Uranus and their houses ONLY? **[Until the 3<sup>rd</sup> initiation (enlightenment), we are still clearing stuff, so still read the Moon. Vulcan/ Neptune over it simply tells us the person on the Path is doing the necessary transformational work.]**
5. **[It is correct to place Vulcan directly over the Moon or Sun, because (on the Path) Vulcan's (Neptune, Uranus) force flows directly through the Moon (astral) / Sun (ego).]**

6. Vulcan in 5H, is asking to establish balance between the sacral and throat chakras .. **[Vulcan only influences on the Path. The life areas that need purifying, are the houses that the Sun and Moon are in. Vulcan is involved with the 1<sup>st</sup> transference , sacral to throat] in humanity.**

7. Difference, Leo Moon vs Leo Sun? **[Moon symbolises defensive habits we fall back into when we feel threatened (eg. Leo, arrogant, roaring); but these are secondary to the Sun Sign traits which is who we identify with when we think of "I am". A Leo Sun may be arrogant, but will also be using positives – wise leadership, sensitive to others – to achieve personality Sun goals.**

8. why we read the LOH with Moon/ Sun? **[Don't understand the question]**

9. **[FMM is for world healing, though can be used for personal growth. Spiritual force is impressing Sun (sign) qualities on humanity.**

10. When you first look at a chart is there any particular order that you take?

a. **Sun (personality), Moon (past, Ascendant signs (Soul purpose) - overview**

b. **Then again, fully with aspects. If rays known, use them now.**

**(Astral with Moon, Personality with Sun, Soul Ray with Ascendant sign.)**

c. **Transits and progressions**
