Sun

- Every person is a miniature sun - a nucleus or centre of creative expression.

- The Personality is the **face** we wear in the world.
- what we feel pleased about, proud about, and so, are easily inflated about.

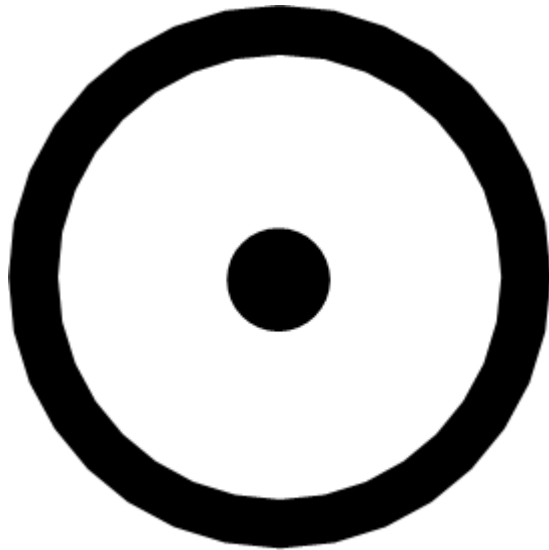

- Exoterically the Sun in Leo, like the sun in the heavens, keeps everyone and everything orbiting around it. In other words, the centre of attention, “look at me”, directing and even controlling.

- Leos like to shine, like the sun.

- like the sun in the heavens, it nurtures, is magnanimous, generous and enlivens those orbiting around it.
- the sun in our solar system vitalizes and gives life to all on this planet.

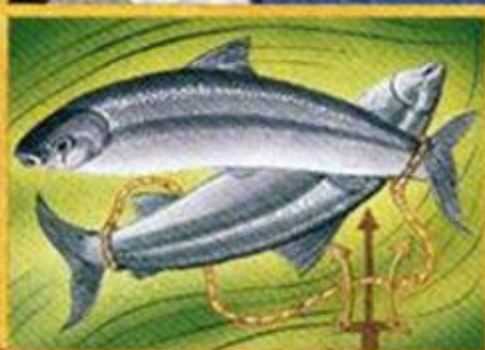

- The sun sign is full of potential, like the amount of unused fuel in the sun.
- As we grow spiritually we invite the fullness of our self to be revealed, we invite the fullness of growth and potential.
- We also invite the shadow side of the personality to be seen and illumined, and so it allows us to see and work on self-improvement.

The Sun

- **Esoterically as the soul ruler, it veils Neptune**

♍ Virgo

• In history Virgo has been represented as Lilith, Eve, Isis and Mary. – the feminine principle that allows for the gestation (growth) of the Christ principle within the cave of the heart.

• Virgo is about purity of the form so that the form is ready for the Christ principle to be nurtured and grown.

Mercury

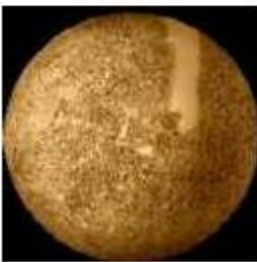

- In Virgo the mind is turned toward the matters of life and hence Virgo can look at the particular, the small, the detail with precision.

- Works with things (matter).

- This leads to seeing that which is not pure, not perfect, does not fit the ideal and hence cannot measure up to the ideal, the purity – results in criticism, fault finding, pickiness

- Leads to professions that deal with the health, of the body (bringing the form to perfection).

Moon

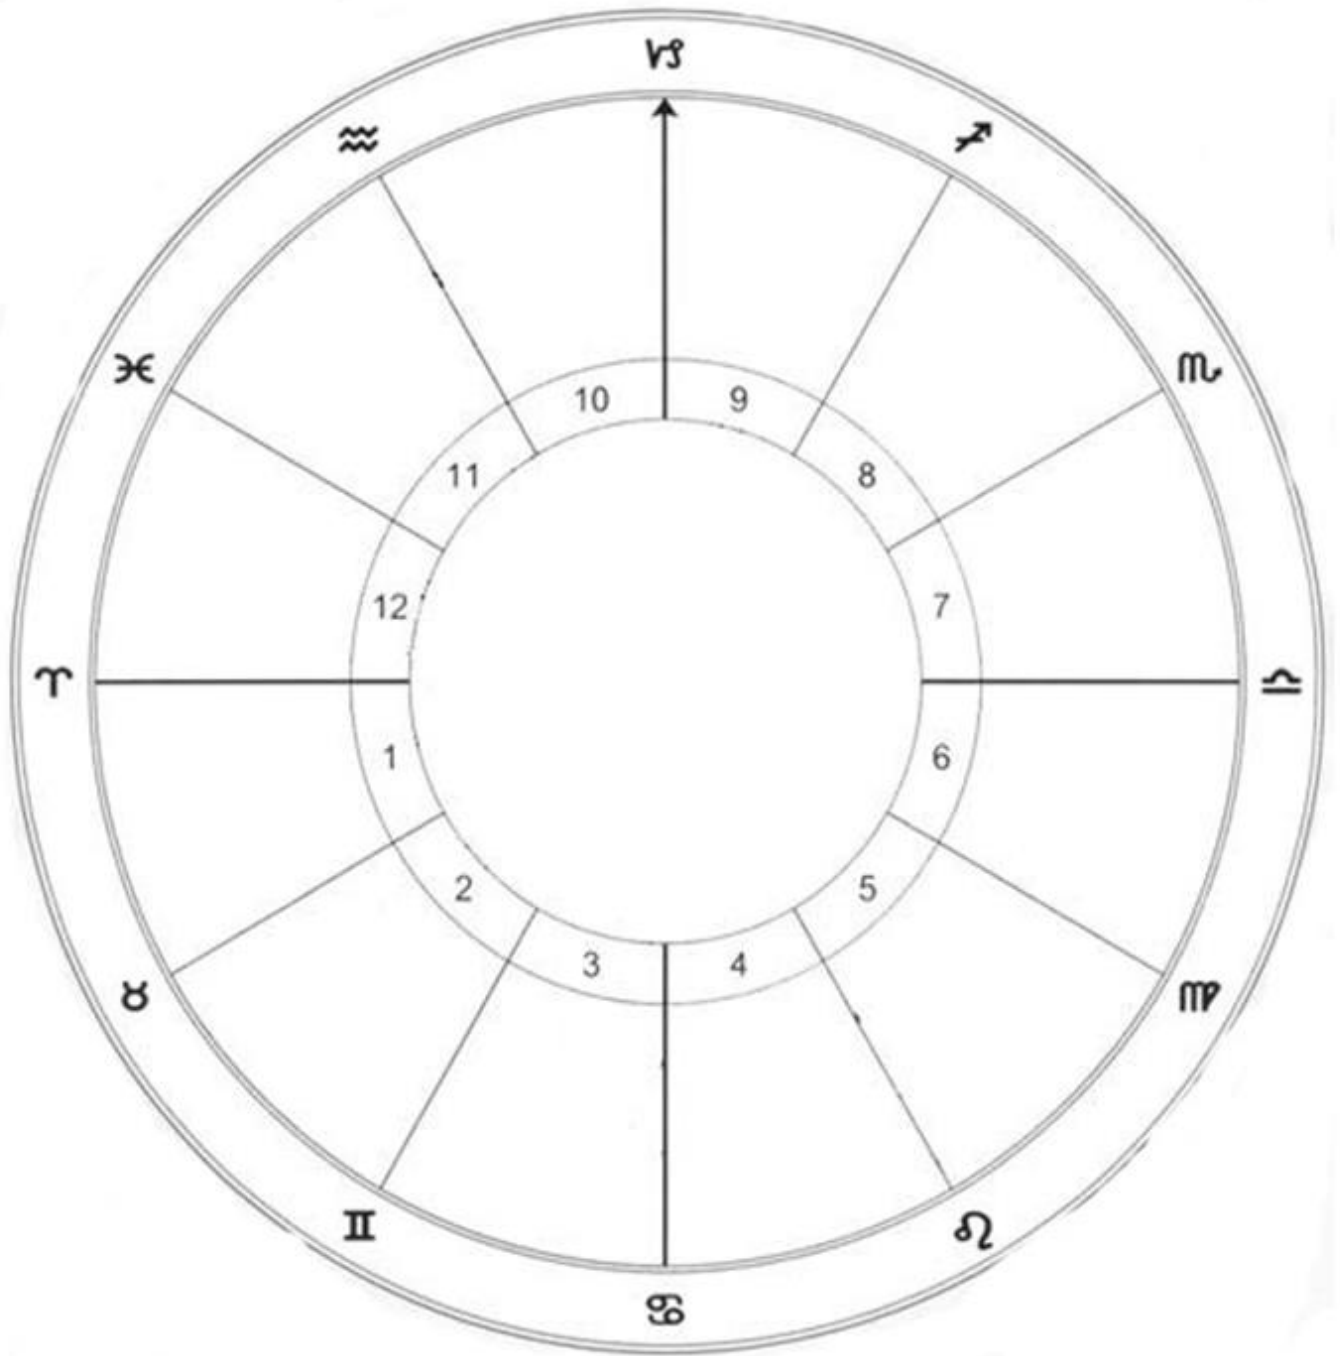

Moon is the Mother of Form

Virgo hides the soul in form – gestating until the baby is ready to be birthed. The form needs to be attended to.

Esoterically, considered as the soul ruler, the Moon veils Vulcan and/or Neptune.
