

SPIRITUAL ORIGINS AND OUR SPIRITUAL GOAL

As fiery Spiritual God-Sparks or Monads, flowing out
through great Beings who ensoul
galaxies and constellations

Via the 7 Rays to our Solar System

OUR GOAL IS "UNION"

TO IDENTIFY CONSCIOUSLY WITH SPIRIT

THE ETHERIC WEB, PRANA, AND THE UNIVERSE

Prana is the Sanskrit word for absolute energy. It is the active principle of life and is all pervading, found everywhere, in everything.

The Etheric Web is the field of space, the composite of all bodies (from a small atom to an expanse we call a universe) and it is a subtle matter that is a constant stream of circulating energies and forces

“Just as the forces of the planet and of the inner spiritual man (to mention only one factor among many) pour through the etheric body of the individual man upon the physical plane, and condition his outer expression, activities, and qualities, so do the varying forces of the universe pour through every part of the etheric body of that entity we call space and condition and determine the outer expression, the activities and qualities of every form found within the cosmic periphery.”

The Vehicles of the Soul according to the Theosophist Diagram of the subtle bodies (from wikipedia)

MENTAL PLANE	HIGHER MENTAL	CAUSAL BODY	TO EVOLVE WITH	IDEALS — ABSTRACT THOUGHTS
	LOWER MENTAL	MENTAL BODY	TO THINK WITH	IDEAS — CONCRETE THOUGHTS
ASTRAL PLANE		ASTRAL BODY	TO FEEL WITH	EMOTIONS — DESIRES
PHYSICAL PLANE		PHYSICAL BODY	TO ACT WITH	SENSORIAL REACTIONS — ACTIONS

The story of man, the aspirant, is the story of his response to energies.

- ❖ The interplay between these different types of energy results in the formation of a congregation of energy we call bodies or vehicles that are specifically developed to develop a conscious response to the life of God.
- ❖ Small units of energy, relatively speaking, are swept into contact with great fields of force, which we call planes.
- ❖ They constitute a temporary form that has externalized and is relatively tangible, and which can function as a medium so the soul can contact larger forms of divine life and expression.
- ❖ The more organized and integrated the form is, and the more perfect it's response mechanisms are (sensorial reactions), the better it is to see the age of the soul and gauge the level of attainment along the path.
- ❖ This is what we want to show you, the interplay of energies of Esoteric Astrology and the Seven Rays.

Introduction to Esoteric Astrology

- What is Esoteric Astrology?
- E.A. looks towards **causes** rather than **effects**, to the life of the human soul that lies behind the outer form, the body.
 - Still limited by the tools with which we work
- Regular, Orthodox and Exoteric astrology – ‘personality’ astrology from the mundane, psychological astrology, fortune telling astrology deals with one’s everyday life and situations.
- E.A. deals with the consciousness aspect, the soul, the part of us that is evolving, that is aware.
 - The purpose is to truly integrate soul into the personality so that one can carry out one’s purpose.

- Many advanced souls do not respond well to traditional (exoteric) astrology readings.
 - we are not fated victims of our horoscope even though we have elected to work off karma or learn certain lessons - we always have a choice; so we can be conscious co-creators of our destiny.
 - Esoteric Astrology gives a larger perspective of life; that we are not just inhabiting a little planet on its own in the solar system, but participating as an energy centre within a greater solar life.

The solar system is a living being, as are all the individual lives which inhabit it – planets, asteroids, comets, human beings or any kingdom in nature.

- Why are we here?
 - To grow, to evolve, to learn our lessons and become the best we can be.
 - When you die, you take nothing with you except your expanded consciousness, so that the next time around you pick up the threads of where you left off.
 - Life is a continuum.
 - You are born with innate qualities through past experiences.
 - Astrology impacts you from the outside in. The combination of the rays and astrology make up who you are and how you move in life.
 - Zodiac (Gr.) – a circle of animals
 - Zodiac circumscribes our solar system
 - Constellation consists of 2 or more stars/suns.

The Natal Chart - Horoscope

- horo – of the hour and scope – to view
- Horoscope – the view of picture of the heavens at the **time, place** and **date** of our birth
- Natal chart – blueprint, a snapshot in time
- Footprint of the soul incarnating
- Soul decides what we need to learn in this lifetime (before incarnation)
- Each of us chooses the family to be born into, time and place, characteristics and circumstances, challenges, all the abilities and powers.
- Via free will, we choose how to react to previously chosen circumstances. This is how we grow and learn.
- Soul chose to incarnate at the exact time that it did.
- Soul decided:
 - a. what treasure or abilities you need to employ most
 - b. what qualities you need to cultivate

The Rising Sign (R.S.)

- Determined by the exact time of birth (first breath) representing the incarnation of the soul.
- The eternal soul comes *before* the personality, therefore rising sign comes first. (hence its importance)
- Represents the clue to the life and life **achievement**.
- The highest express of the R.S. is highest quality that the soul can potentially unfold in any lifetime, hence its importance.
- R.S. is the method by which soul will work out its purpose in a given life. It is not the soul.
- This is where the stretch is in the life.
- R.S. will express personality characteristics as well.

Moon

Represents traits that we need to understand fully.

forward.

The moon in the heavens is dead, not a living entity
anymore. Now it only reflects the light of the sun.

- **Exoteric** - drive of sexual power, control, manipulation of energy on the emotional plane. – represents desires, passions, physical drives, warfare. It embodies 6th R force and this results in the destructive fanatical types so often found when this planet is strong.
- On the positive side it is the 6th ray that will offer the strength, intensity, determination and courage to be the warrior of one's self-created demons.
- **Esoteric** – bring energy to focal point, courage to step into one's own darkness, one's waters and to release and liberate.

 - Scorpio's way of fighting is not direct. It is subtle and powerful because it is contained by waters and concentrated.
 - Aries' battlefield is himself. Aries rules beginnings and Scorpio rules death, so that the personality must die in Scorpio in order that the soul can come into activity
 - Mars in Aries – how I drive myself, use energy, move in the world.

- Death as the Great Releaser, which shatters the forms which are bringing death to that which is embodied.
- Death of desire, death of personality and all which holds man between the pairs of opposites, in order to achieve final liberation (1st ray).
- **To the soul**: it represents an opportunity to eliminate limitation.
- Death never destroys the consciousness aspect.

Mars ✳ Pluto
Power and initiative!

- When there is Pluto stuff happening in the chart it does not feel clear cut. It is weighty and you can't think your way out of a Pluto transit but you most definitely stand in another place after the transit. It is a long process because Pluto moves relatively very slowly. Its orbit is the longest of all the planets that have been spoken about because it is the furthest away from the sun, the darkest, and hence rules the Underworld – a place known for darkness and things are not very clear.
- Things need to come up into the light of day to be understood.
