A newer and more adequate teaching next century

“First of all, the books were published and they came out in ordered sequence and provide a body of teaching and of truth which will serve the needs of the coming generation. It is for my disciples to safeguard this presentation of truth during this century and to see to it that the books are sent forth steadily upon their mission, **until they are finally superseded next century by a newer and more adequate teaching.**” (DINA 1 31) 1955

New visualization applied to cycles

“Through the practice of the power of visualisation, the third eye is developed. The forms visualised, and the ideas and abstractions which are, in the process, mentally clothed and vehicled, are pictured a few inches from the third eye. It is the knowledge of this which causes the Eastern yogi to speak of "concentration upon the tip of the nose." Behind this misleading phrase a great truth is veiled.” (TCF 1013)

Cycles and Spheres to the 10th Dimension

This cosmic centre in turn forms part of a great wheel till—to the eye of the illumined seer—the entire vault of Heaven is seen to be in motion. All the constellations, viewing them as a whole, are impelled in one direction.

The Old Commentary expresses this obscure truth as follows:

"The one wheel turns. One turn alone is made, and every sphere, and suns of all degrees, follow its course... Within the wheel, forming that wheel, are all the lesser wheels from the first to the tenth dimension. These in their cyclic turn hold in their spheres of force other and lesser wheels. Yet many suns compose the cosmic One.

Wheels within wheels, spheres within spheres. Each pursues his course and attracts or rejects his brother, and yet cannot escape from the encircling arms of the mother...

It will, therefore, be apparent that the power of man to conceive of these whirling constellations, to measure their interaction, and to realise their essential unity is not as yet great enough" (TCF 1085)

THE FLASHING FORTH AND CYCLIC APPEARANCE OF 7 TYPES OF MONADS AND SPIRITUAL TRIADS

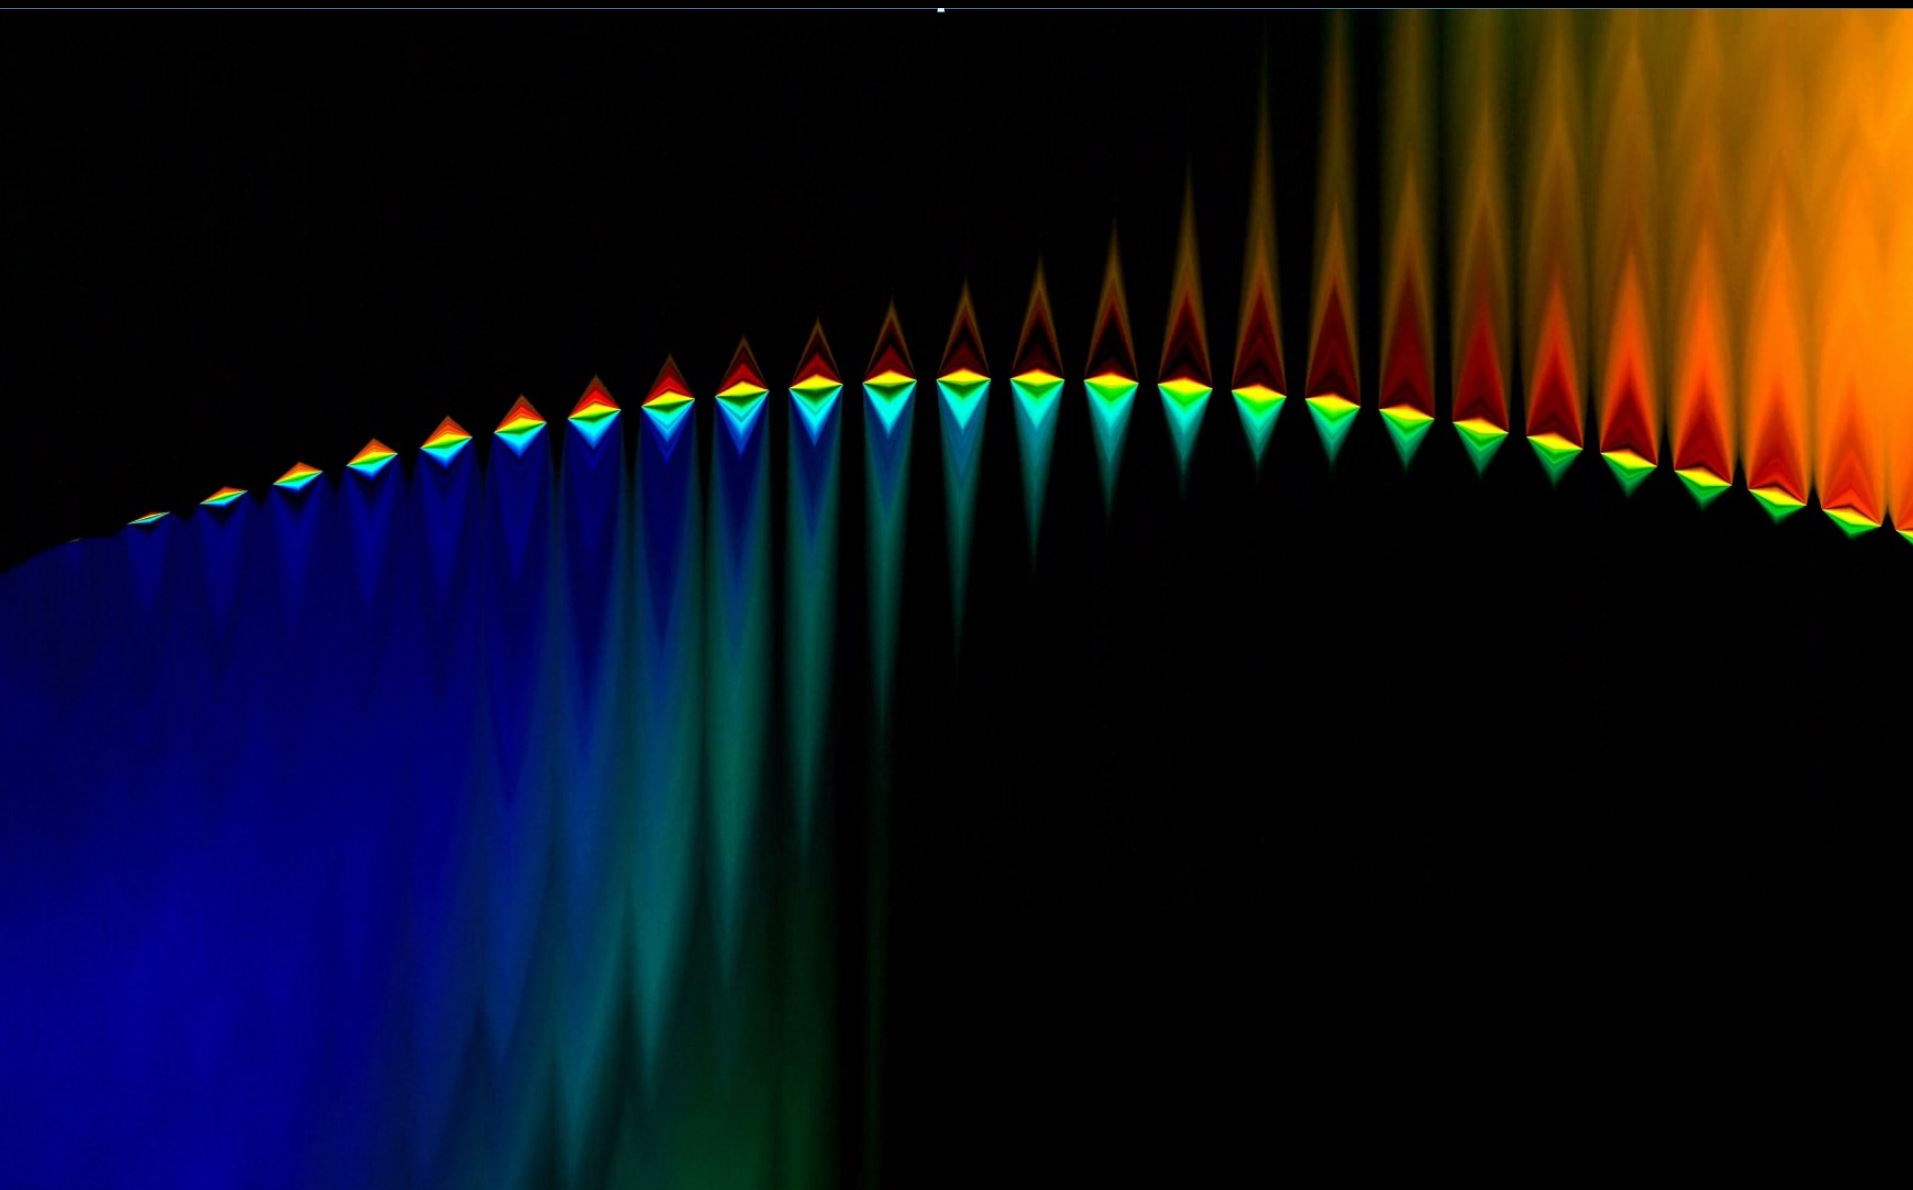

“Finally there is the Monadic Flame Divine. This embodies the highest vibration of which the Monad is capable, is governed by the Law of Synthesis, and is the cause of the forward progressive movement of the evolving Jiva-soul...”

Each Monad that cycles in from higher levels has three expressions we call the spiritual triad or atma, buddhi and manas.

This higher triad has its lower correspondences on soul levels and is referred often to as higher mind, The son of mind, and the lower mind.

This soul triad of forces just mentioned has its lower correspondences on the physical plane through the students three personality vehicles or three lower rays of the physical-etheric, astral and concrete mind.

These 7 types of spiritual triads come in and out of expression in cyclic waves that can span millions of years as they flash forth in a cyclic rhythmic cadence that will be symbolized in the next animation.

THE PRINCIPAL OF MUTATION

Where all proceeds in ordered sequence

- **Initiations Human and Solar:**
- **An inexplicable principle of mutation exists in the Mind of the Logos, or the Deity of our solar system, and governs all His actions. We see but the ever changing forms, and catch glimpses of the steadily evolving life within those forms, but as yet have no clue to the principle which works through the shifting kaleidoscope of solar systems, rays, hierarchies, planets, planes, schemes, rounds, races, and subraces. They interweave, interlock, and interpenetrate each other, and utter bewilderment is ours as the wonderful pattern they form unfolds before us. We know that somewhere in that scheme we, the human hierarchy, have our place. All, therefore, that we can do is to seize upon any data that seems to affect our own welfare, and concerns our own evolution, and from the study of the human being in the three worlds seek to understand somewhat the macrocosm. We know not how the one can become the three, the three become the seven, and so proceed to inconceivable differentiation. To human vision this interweaving of the system forms an unimaginable complexity, the key to which seems not to be forthcoming. Seen from the angle of a Master we know that all proceeds in ordered sequence. Seen from the angle of divine vision the whole will move in harmonious unison, producing a form geometrically accurate. Universal Magnetic Ocean

“By the radiant light of the universal magnetic ocean, whose electric waves bind the cosmos together. And their ceaseless motion penetrate every atom and molecule of the boundless creation” (Isis Unveiled, p28)

“Energy is a life fluid circulating throughout the entire body of the Logos, and vivifying therefore even the tiniest atom in that whole. It is valuable to endeavour to grasp the picture and to vision the wonder of what is transpiring.” (TWM 365)

The swirling tide of intermingling currents

- “It will be apparent to any student who has even slightly developed the power of visualisation, and has some realisation of the force currents of the solar system, that all can be regarded as the swirling tide of intermingling currents, with numerous focal points of energy demonstrating here and there, yet in no way static as to location.” (TCF p. 10570)

Alaya, the 7 Rays and Spiritual Cycles

Kalahansa, the Great Swan whose arched wing hovers over the illusion of manifestation – hovers and shifts and becomes the world-swan, the swan maiden, the swan song of life and death. Into this world there came the swan of heaven; forefather of all swans, mother of all races, cherished emblem of many peoples. There is hardly a race on earth that does not have tales of swan beings or rituals in recognition of their sacredness. Few there are who have not heard the variously told stories about the changeling powers of this great aerial creature. As a symbol, the swan transcends all levels of understanding and yet reminds the smallest child to have faith in growth and fruition. It is an extremely complex symbol of transcendence, of spirit in the world, of cycles and creations.

H. P. Blavatsky wrote:

“What is the belief of the inner esoteric Schools? the reader may ask. What are the doctrines taught on this subject by the Esoteric “Buddhists”? With them “Alaya” has a double and even a triple meaning. In the Yogacharya system of the contemplative Mahayana school, Alaya is both the Universal Soul (Anima Mundi) and the Self of a progressed adept. “He who is strong in the Yoga can introduce at will his Alaya by means of meditation into the true Nature of Existence.”

The Joy the Master Knows

“Happy the disciple who can bring the vision nearer still to humanity and work it into existence on the physical plane. Remember this, that the materialization of any aspect of the vision on the physical plane is never the work of one man. Only when it has been sensed by the many, only when they have worked at its material form can their united efforts draw it into outer manifestation. Thus you see the value of educating public opinion; it brings the many helpers to the aid of the few visionaries. Always the Law holds good; —in descent, differentiation. The two or three sense the plan intuitively; then the rhythm they set up with their thought sweeps the mental plane matter into activity; thinkers seize hold of the idea. This is a hard thing to learn and difficult to do but the reward is great.

To those who wrestle, strive, and hold on, the joy is doubled when the materialisation comes. The joy of contrast will be yours, for knowing the past of darkness you will revel in the light of fruition; the joy of tried and tested companionship will be yours, for years will have proved to you who are your chosen associates, and in community of suffering will come the strengthened link; the joy of peace after victory will be yours, for to the tired warrior the fruits of achievement and rest are doubly sweet; the joy of participation in the Masters plan will be yours, and all is well that associates you closely with Them; the joy of having helped to solace a needy world, of having brought light to darkened souls, of having healed in some measure the open sore of the world's distress, will be yours, and in the consciousness of days well spent, and in the gratitude of salvaged souls, comes the deepest joy of all, —the joy a Master knows when He is instrumental in lifting a brother up a little higher on the ladder. This is the joy that is set before you all—and not so very far ahead it lies. So work, not for joy but towards it; not for reward, but from the inner need to help; not for gratitude, but from the urge that comes from having seen the vision and realisation of the part you have to play in bringing that vision down to earth.” (TWM 368-369)

The magnetic atom

Note of the translator

What follows is the resumed and translated text of the original Italian book "L'atomo magnetico" (1954) by Pier Luigi Ighina. This book is the only one written by the scientist.

Pier Luigi Ighina has been a co-operator of Guglielmo Marconi and shared his most secret experiments. During his whole life he has worked without being recognized by the scientific community and achieving incredible results which are even today not imaginable for most scientists. He is now 93 years old and goes on with his researches.

With this translation I want to introduce this incredible scientist to the English speaking world and I hope that this will cause a growing interest in his work which could be of great help in today's social and environmental situation.

Regarding the translation, I excuse myself in advance for every mistake I might have done translating his work, but I believe that the main facts are correct.

In order not to change the original meaning, I have translated the Italian words "materia" and "atomo" into "Matter" and "Atom" using them the way he did, which means that "Materia", for example, is used for both living and non-living substances and "Atomo" is used in a wider meaning than what we are used to. Concerning the use of the word "Magnetic", my personal opinion is that also this word is to be understood in a much larger conception of Magnetism than what we are usually accustomed to.

I hope you enjoy the reading and feel the big impact these discoveries could have in today's scientific understanding of the World, Man and Life.

New words and new symbols that will reveal the hidden aspects of deity

- Speech is one of the keys which opens the doors of communication between men and subtler beings. It gives the clue to the discovery of those entities who are contacted on the other side of the veil. But only he who has learned to keep silent, and has arrived at the knowledge of the times to speak can pass this veil and make certain esoteric contacts. Magic consists, we are told in the Secret Doctrine, in addressing the Gods in Their own language; therefore, the speech of average man cannot reach Them.
- Therefore, those who seek to learn the occult language, those who yearn to become aware of the words which will penetrate to the ears of those who stand on the other side, and those who seek to utilise the formulae and phrases which will give them power over the Builders, have to unlearn their previous use of words and to refrain from ordinary methods of talking. Then the new language will be theirs and the new expressions, words, mantrams and formulas will be entrusted to their care.
- [Page 982]
- The laws of speech are the laws of matter and students can apply the laws governing physical plane substance to their use of words, for it concerns the manipulation of matter on other levels. Speech is the great medium whereby we make apparent the nature of the little system we are constructing—that system of which each human unit is the central sun, for under the Law of Attraction he draws to himself that which he needs. The 3-fold Antahkarana Bridge

BURN STEADY, BURN BRIGHT, BURN ETERNAL,

- It is this cyclic see-saw type motion that expresses when seen from another perspective the rotary and cyclic-spiral motion all spiritual forces must experience and undergo in their development. In this animation we can also see symbolically the great in-breath and out-breathe of deity so often spoken of in occult literature. The upper spiritual triad we are outlining here has its triangular point up and the personality triangle pointing down. The Soul or divine Jivas we know is what mediates between these two diverse triangle-triads and brings them cyclically together for liberation to occur.
- Although this fusion of the upper and lower triad can be seen with rapid speed taking place in mere seconds in this animation, in reality this dynamic enfoldment process or progression can take thousands of incarnations and millions of years of evolution. The student with the aid of this audio-visual demonstration can sense the cyclic and wave like motion all higher spiritual beings express as they go through or evolve in their evolutionary development, be they planetary, solar or of cosmic origin. In these higher domains time as man understands the term is largely an illusion.
- Technically during this present cycle for humanity only three types of monads are found on rays 1, 2 and 3 and will be manifesting. When the big picture is seen however all 7 Monadic types will flash forth at their appropriate time.
- This is not an original work of art of mine but adapted from an anonymous artist.

- and finally the fundamental **store-house consciousness** which is the basis of the other seven.^[3] This eighth consciousness is said to store the impressions of previous experiences (7 rays into one primordial ray)
- That storage consciousness contains all the impressions of previous experiences “perfumings”), which form the seeds (of future karmic action, an illusive force that creates categories that are in fact only fictions. That illusive force (*maya*) determines the world of difference and belongs to human nature, producing the erroneous notions of an I and a non-I. That duality is conquered only by enlightenment (*bodhi*), which transforms a person into a buddha.

- **Alaya** is a [Sanskrit](#) word meaning "abode, dwelling." In the [Yogacara](#) school of [Buddhism](#) it is usually employed in connection with the word *vijñāna* (consciousness) as *ālayavijñāna* ("store-house consciousness").
- In the [Theosophical](#) view, Alaya is regarded as the Universal Soul as the basis of all. In the listing of [cosmic planes](#), Alaya is regarded as the sixth one (counting from the lowest plane "upwards"). However, it is also reflected on the corresponding [Prakritic planes](#). In human beings, [buddhi](#) is regarded as a ray of Alaya.
- The terms [anima mundi](#) and [over-soul](#)^[1] are frequently used as synonyms for ālaya.
