

"Blaze of Refulgent Glory"

Awakening the Higher Mind and the Intuition

*Avatars - Asteroids
and
Planetary Crises*

Main Theme

- How contemporary science is continually discovering what the Ageless Wisdom Teachings have known and affirmed for thousands of years. How Esoteric Wisdom and Knowledge is slowly becoming Exoteric.
- A. Our connection to the stars and other planetary and heavenly bodies. (the hidden channels or conduits)
- B. Technically how this transmission of the greater forces in the universe communicate with one another or travel from a higher level to a lower one on the inner planes.
- D. We outlined in our last meeting how the asteroid Atlas 3 moving now through our solar system in Oct-December may have spiritual implications according to the ageless wisdom teachings. (Expand)
- C. Feedback and personal sharing.

Shamballa impact of 2025

One of the greatest events in the history of science and humanity is now taking place and we on a deep subjective level may be an intimate part of this awesome event.

It has been prophesized that the Shamballic impact of 2025 will bring revolutionary changes to our personal perceptions of reality, our group work, and the entire planet.

HUMANITY IS IN A PLACE OF GREAT HISTORICAL CRISES AT THIS TIME

Is it possible that the only way man can reverse his downward spin into another world war or international crises is by either the intervention of force from outside our planetary or solar system, or some huge environmental crises that eclipses all local problems and for the very first time requires humanity to work together in a unified way.

The Alternative Is Another War

There are necessarily many lesser problems but these cover the major ones with which humanity is at this time confronted, and which must find some solution during the next twenty-five years. If no progress is made and these problems remain unsolved, at least in some measure, and if humanity slips back into the status existing prior to the war, then nothing can stop the next war. If it comes, it will bring the final death blow to the human race. Mankind as we know it, could not survive, nor would it be right and good that it should. The death of a race might then be decreed and the long process of nurturing a race of men who would finally express divinity would have to be started all over again. These are not idle words, but the formulation of a possibility which can be clearly visioned, but which need never materialize if humanity learns the lesson of this war, recognizes its mistakes, and sets in deliberately to take those steps which will make such a happening as the past war (1914-1945) an impossibility. This will have to be done by the simple method (simple to write but difficult to implement) of *establishing right human relations between men and between nations.*

I have pointed out seven problems with which man must deal. They concern the material and the psychological fields of human enterprise. When I use these words I include the educational field, and the ecclesiastical. Let me point out, however, the immediate spiritual problem with which all are faced. It is the problem of gradually offsetting hate and initiating the new technique of trained, imaginative, creative and practical goodwill.

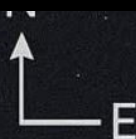

Divine Intervention:

- We have, therefore, hinted at the following forms of divine intervention:
- 1. Divine embodiments
- 2. Natural cataclysms
- 3. Evocation of slumbering Entities
- 4. Emergence of inspired leadership.
- There still remains one mode of intervention which is still more mysterious, illimitably more powerful, and definitely more difficult both to evoke and subsequently to contact. This is the emergence, response, or appearing of great Sons of God Who dwell in sources far removed from our planetary life altogether; this involves the appearance of Lives of such stupendous and divine expression and potency that only the massed spiritual purpose of vast numbers of men can be potent enough and far-reaching enough to pierce beyond the veil which protects the Earth, to those far distant realms where They have Their natural and everlasting abode. They cannot be reached by prayer or even by well formulated desire—the expression of the wish life of the masses. They lie utterly beyond the realm of feeling (as humanity understands it) and dwell ever in that high place which can only be reached by intentionally directed, selfless thought.
- Are there enough people in the world today whose focussed and illumined thought can be organized and directed towards these Lives in such a manner that They can be attracted and led to respond to human need for deliverance? Such is the problem. It is possible, but not, perhaps, probable. The problem of a blended demand from the spiritual Hierarchy and from humanity—simultaneously expressed—will have to be met, and this is by no means easy of accomplishment.
- unhappy present, and an event take place which will produce stupendous changes.

Michio Kaku: 9 Hidden Objects Discovered Escorting 3I/ATLAS Through Our Solar System!

Comet's trajectory traced back in time 4.27 million years

Using data from the [European Space Agency's now-retired Gaia space telescope](#), the study authors traced the comet's trajectory back in time 4.27 million years and identified 62 nearby stars that the interstellar object likely encountered along the way. Using Gaia's high-definition data on the stars' motions, velocities and sizes, the study authors concluded that none of them have significantly altered the comet's orbit — hinting that it did not originate anywhere near us.

This led the team to postulate that "3I/ATLAS is a very old object, that has been traveling for [billions of years]

Is there life on Mars?

“In “The Secret Doctrine” (Vol. 1, p. 165) it is stated that there is “life on Mars” but it seems to be implied that it is currently taking place on one of the *non*-physical globes of the Mars Chain, the physical and physically visible globe of that Chain currently being in a state of “obscuration” known in Sanskrit as “pralaya”; in other words, a temporary lifelessness until the evolutionary life wave of Mars passes once more onto the physical level.”

We are not alone!

PONDER ON THIS

“In my last instruction, I made the statement that meditation was the major creative agent in the universe. There are other universes that are ahead of us in development and, in them, the emphasis may not be upon creation by use of mental energies; others may not be so advanced and, in them, mental energy may be in the process of unfolding or expressing itself—in the evolutionary sense. There are also universes and solar systems where the quality and the conditions of the manifesting universe, solar system or planet are unknown to us. It must be borne in mind that though in all manifestations the three aspects (of purpose or will, attraction, magnetic love or plan, and appearance as manifestation of both of these) are necessarily present, the manifesting Entity (responsible for these expressions of divinity) may work through and "occultly declare" conditions and qualities of which we have no experience or knowledge. We may possess utterly no idea in the highest flights of our abstract thinking (and this includes the most advanced thinkers upon our planet) of the nature of the impulses and concepts which animate certain universal Creators. Ponder on this.” (DINA 2, 208-9)

Effect upon the planets and our Solar System of what are called "asteroids"

It has been proven by new Electric Universe Theory's that asteroids and comets are not merely composed of metal, ice, rock and gas as conventional science has indicated but also veil powerful magnetic and electrical forces as well. Plasma we know is the 4th state of matter.

The 5th state of matter is the Bose-Einstein condensate (BEC). Plasma is a superheated, ionized gas composed of electrically charged particles, often found in stars and lightning. In contrast, a Bose-Einstein condensate is formed by cooling atoms to near absolute zero, causing them to merge into a single quantum state.

Esotericism teaches that asteroids and comets are the physical bodies of spiritual entities and that these entities can bring new and dynamic influences into our Solar System. When speaking of hidden etheric planets in our solar system of which there are a number, the Master DK has this to say on the subject of asteroids:

"Figures also must be computed when the effect upon the planets of what are called "asteroids" is known. This is much greater than exoteric science has so far admitted, but the significance of this must eventually be interpreted in terms of energy and on etheric levels." (TCF 795)

Giving birth to something new.

Rudolf Steiner has put forward the idea that this influence of a comet or asteroid passing through our solar system is like a type of spiritual impregnation that has a specific intent and is not by mere chance or simply a random act. To give birth to something new that will only later emerge in its full potency when this gestation period has matured.

Rosicrucian's

The Rosicrucian's have suggested that this entry of an asteroid or comet moving through our solar system can magnetically attract negative and malefic forces in its path and remove them in its swift passage. They can also have a hidden spiritual counterpart of radiating redemptive spiritual energy. In its most simplified form an Asteroid could be seen as a saving force or a potential Avataric expression.

We have been taught in the Ageless Wisdom Teachings that the Avatar of Synthesis can come no lower than the mental plane in its expression. Is it possible that lesser saving forces that have been prophesied to make their appearance or impact on our solar system historically at this time may require on the lowest or densest levels of material manifestations, the use of these asteroids and comets to fulfill some aspect of their high mission? The passing of a large comet or asteroid into our system may be a special event that will be seen by the uninitiated person as just some mechanistic phenomenon of little importance. This is precisely why DK has indicated throughout his many works the importance of the spiritual disciple, and eventually all of humanity, developing etheric vision so that this type of phenomenon can be seen in its full implications and true inner spiritual workings.

Shamballa: The urge to Synthesize

- “The coming Avatar who not along the line of our humanity at all.
- "The Messenger who will later come and express the Shamballa urge to synthesis, the hierarchical aspiration towards love and the desire of humanity for intelligent activity with combined power will gather all into Himself. All these qualities will focus in Him, plus another quality or divine principle of which the race of men as yet knows nothing and for which there is, as yet, no name. He will be a great and potent Avatar and is not along the line of our humanity at all.” (Destiny of the Nations 141)

“ENERGY FOLLOWS THOUGHT”

When humanity becomes invocative enough, he may, under certain conditions, invoke the intervention and assistance of other life forms in the universe who are more advanced than him and of which we know practically nothing. These saving forces can only find receptivity in their higher expression by disciples and initiates found in The New Group of World Servers and discipleship ranks which we know is composed of advanced humanity. Festival periods and Full Moon meditations and rituals are an example of these cyclic periods, who's primary purpose is to invoke the forces of light and be a preparation to the important Reappearance of the Christ.

Avatars "hitch rides" on comets,

"Comets make regular appearances and it has been said that Avatars "hitch rides" on comets, which are dynamic living beings. H.P. Blavatsky makes some observations on comets in *The Secret Doctrine*:

"The planets were all comets and suns in their origin – the sons of light clothed themselves in the fabric of darkness. They all have a common origin. Centres of Forces at first, the invisible sparks of primordial atoms differentiate into molecules, and become Suns—passing gradually into objectivity—gaseous, radiant, cosmic, the one "Whirlwind" (or motion) finally giving the impulse to the form, and the initial motion, regulated and sustained by the never-resting Breaths—the Dhyan Chohans.

The assertion that all the worlds (Stars, planets, etc.) ... become first comets, and then Suns to cool down to inhabitable worlds, is a teaching as old as the Rishis. The birth of the celestial bodies in Space is compared to a crowd or multitude of "pilgrims" at the festival of the "Fires." Seven ascetics appear on the threshold of the temple with seven lighted sticks of incense."

Extracted from Phillip Lindsey's monthly astrological news

Evil, and the dark lodge are clearly visible in many ways and it is impossible not to be seen.

You, as members of The New Group of World Servers, as disciples and initiates will become the litmus test or the sounding board upon which this drama or expansion of spiritual energy and force will be played. You, your spiritual friends, colleagues and co-workers, the many groups with which you work, the whole of humanity are the experiment and recipients upon which new and comic forces are now playing. DK has clearly stated that this is the time historically of the gathering in of the spiritual Arhats and that when opportunity comes over the spiritual horizon we must seize it. Will you rise to this new and dynamic occasion or will you become numb, overstimulated or incapacitated by them? Will we use these new and dynamic forces for spiritual reconstruction or simply to play longer in the garden of the senses? Keep a journal, collaborate with your group brothers and sisters and expand your service work.

THE GROUP AS A SHINNING SUN

"The group idea is a shining sun that dissolves the brooding clouds of melancholia that can sometimes engulf the disciple in the current world climate, where large numbers of the population are suffering from widespread depression and lowered physical vitality"

Alaya: Swan out of Time and Space

Fohat and the seven daughters and sons moved like a Cosmic Swan or Wave over the face of the material world.

In the beginning, when the Infinitude was without form, and chaos, or the outer space, was still void, Darkness (Kalahansa Parabrahm) alone was.

Kalahansa, the Great Swan whose arched wing hovers over the illusion of manifestation – hovers and shifts and becomes the world-swan, the swan maiden, the swan song of life and death. Into this world there came the swan of heaven; forefather of all swans, mother of all races, cherished emblem of many peoples. There is hardly a race on earth that does not have tales of swan beings or rituals in recognition of their sacredness. Few there are who have not heard the variously told stories about the changeling powers of this great aerial creature. As a symbol, the swan transcends all levels of understanding and yet reminds the smallest child to have faith in growth and fruition. It is an extremely complex symbol of transcendence, of spirit in the world, of cycles and creations.

THE MANTRA OF FIRE:

"I seek the way, I yearn to know.

Visions I see and fleeting deep impressions.

Behind the portal, on the other side,

lies that which I call home.

For the circle has been well nigh trod and the end approaches the beginning. I seek the way, all ways my feet have trod.

The way of fire calls me with fierce appeal.

Naught in me seeks the way of peace.

Naught in me yearns for earth.

Let the fire rage, the flames devour.

Let all the dross be burnt.

And let me enter through that gate and tread the way of fire."

The Fires of Purification
