# Presentation Outline

We left off our previous discussion on the development of our inner personal geometry and the electrical makeup of the inner bodies.

After a brief recapitulation on that subject we will approach it from a larger and more macrocosmic angle revealing the alliance between Esoteric Astrology and Mystical Geometry on a planetary level.

Students of the Ageless Wisdom Teachings often ask what will be the next wave of the Ageless Wisdom Teachings. I make no personal claims, but Several quotes by the Tibetan Masters will gives us some clues as to where some these new esoteric teachings may emerge.

# Egoic Alignment and Geometry

“This morning, I would touch on the matter of Egoic alignment again, showing you, under the Law of Correspondences, the universal application. It lies based in geometry, or in figures and numbers.

Each life that the Personality leads is, at the close, represented by some geometrical figure, some utilisation of the lines of the cube, and their demonstration in a form of some kind. Intricate and uncertain in outline and crude in design are the forms of the earlier lives...” (LOM 6)

**“When he steps upon the  
Path of Discipleship, the  
purpose consists in merging  
all these many lines into one  
line, and gradually this  
consummation is achieved...  
The six-pointed star becomes  
the five-pointed star, the  
cube becomes the triangle,  
and the triangle becomes  
the one; whilst the one (at  
the end of the greater cycle)  
becomes the point in the  
circle of manifestation.”  
(LOM 6)**

# These triangles must be regarded as in rapid movement.

- I wonder if you can grasp at least partially and symbolically the fact that these triangles must not be thought of as placed, static and eternally the same, or even as three dimensional. They must be regarded as in rapid movement, revolving eternally in space and ceaselessly moving onward and as of fourth and fifth dimensional extension. There is no way of depicting them or of bringing them visually to your attention, for only the inner eye of vision can imagine their progression, position or appearance. .... Therefore the entire cosmic web and solar system is an intricate, constantly moving, interwoven series of triangles wherein each point of a triangle emanates three lines or streams of energy (nine in all); it is likewise responsive to and receptive of the energies—likewise triple in nature—which lie within its periphery or sphere of influence and vibratory activity.

# New Astrology

## Triple Sun Meditations.

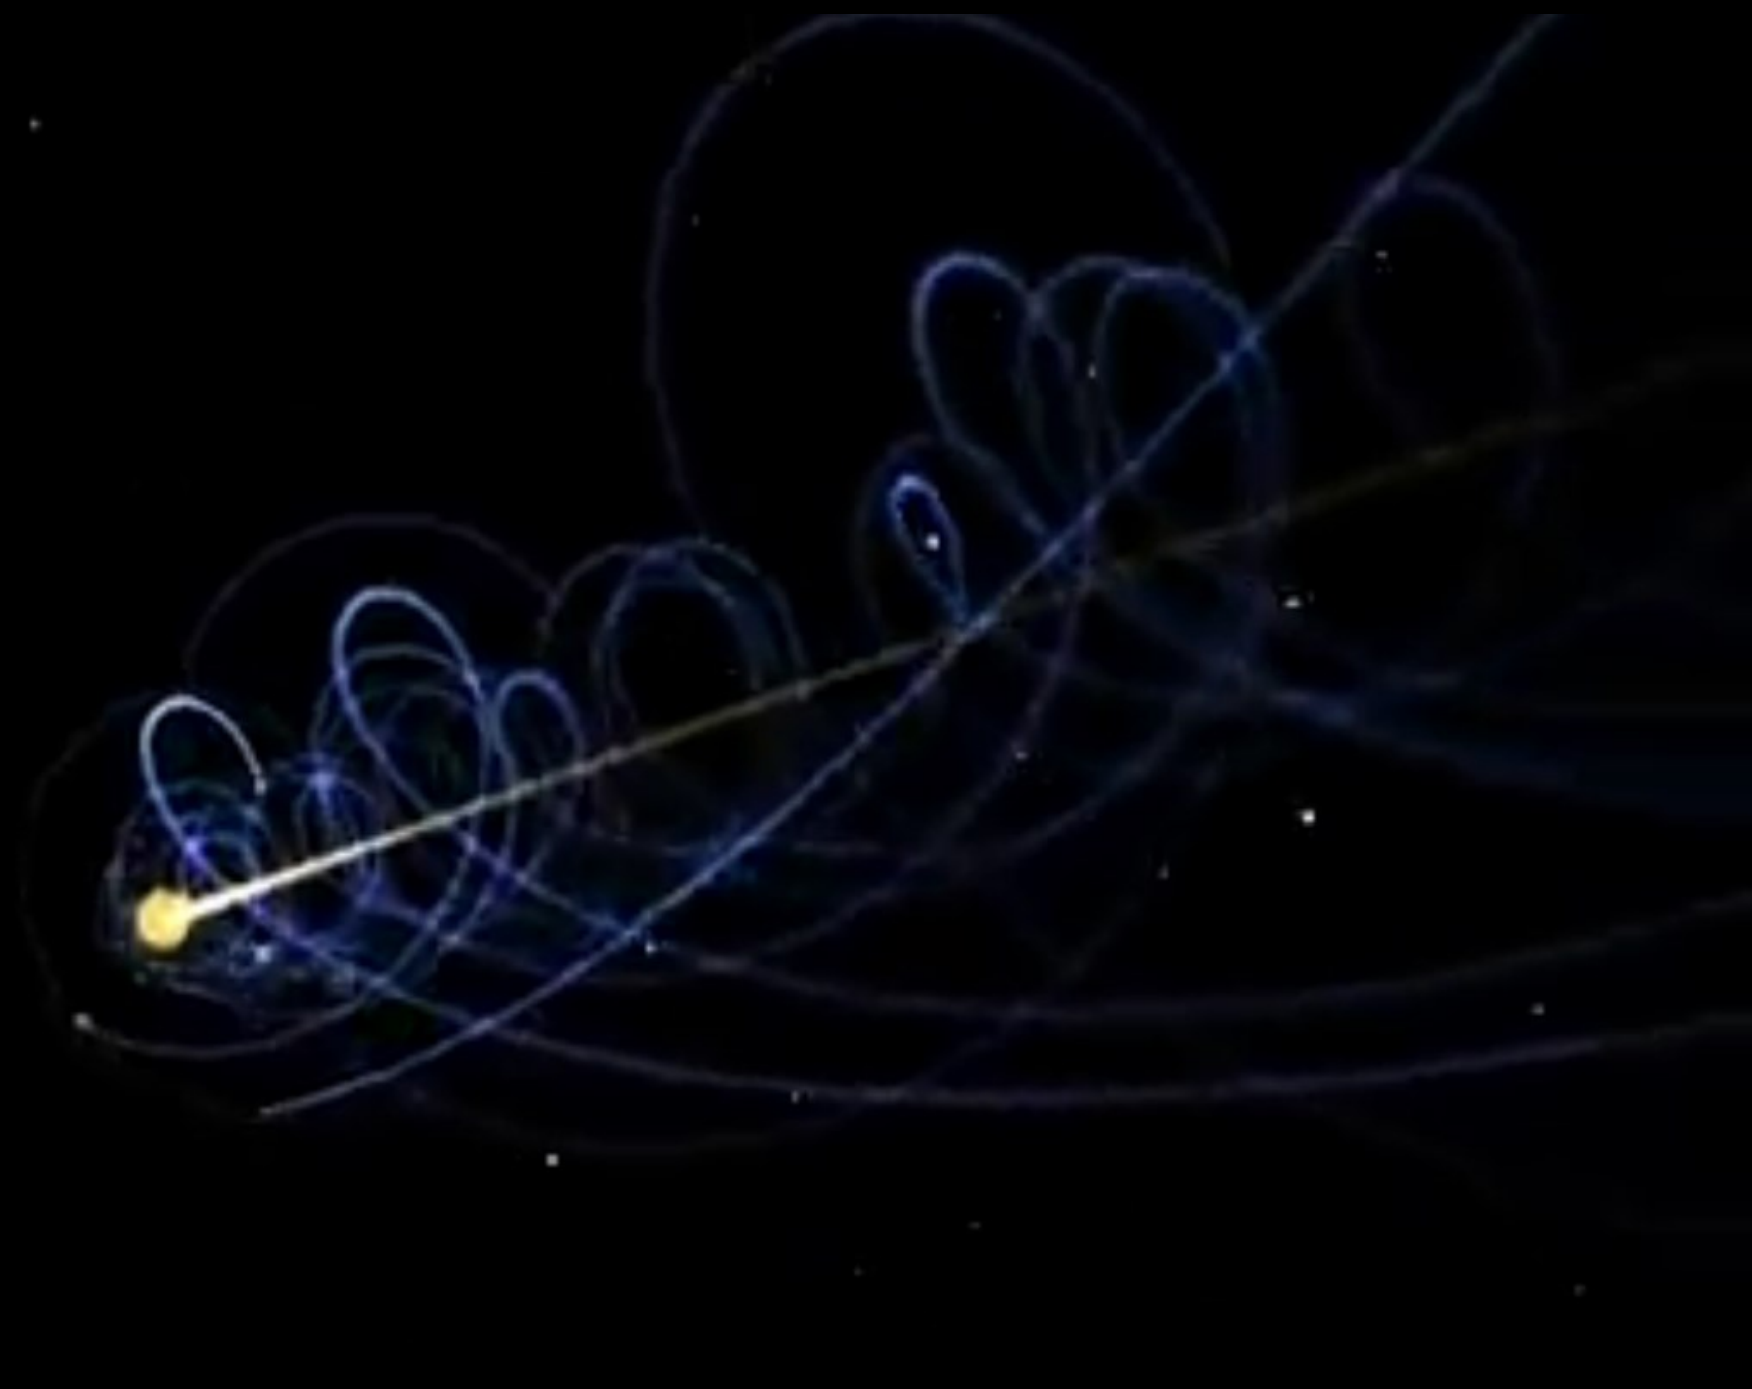

- 1. The Sun Sign conditions the personality.
- 2. The Rising Sign conditions the inner person or soul and will eventually dominate the Sun sign.
- 3. The Opposite of the sun sign conditions the Monad and will eventually dominate the Rising Sign and demonstrate the fusion of the three potencies.
- 4. Based on the science of triangles.
- Walter Pullen See the bottom of the page <https://www.astrolog.org/astrolog/asteso.htm#triple> for more about Triple Sun Charts, how to display them in Astrolog, and a link to SDP's article on the subject. Yes, I spoke about Triple Sun Charts at the 2017 SRI Esoteric Astrology pre-Conference, and I'll attach my slides for that talk.

# Alliance between Esoteric Astrology and of Mystical Geometry

“When, therefore, the esoteric side of astrology, and of mystical geometry, has been studied, and alliance has been made between these two sciences, a flood of light will be thrown upon this matter of the intelligent principle; when the inner workings of the Law of Cause and Effect (the law whereby the Lipika Lords govern all Their action) is better comprehended, then—and then only—will the sons of men be able to study with profit the place of manas in the evolutionary scheme. At the present time it is not possible to do more than point out the direction of the path which must be trodden before this abstruse matter can be made clear, and to indicate certain lines of investigation which might (if strenuously and scientifically followed) yield to the student a rich reward of knowledge. Until the intuition is better developed in the average man, the very principle of manas itself forms a barrier to its due understanding.” (EA 396-97)

# Earth – Venus Dance

Take the orbits of any two planets and draw a line between the two planet positions every few days. Because the inner planet orbits faster than the outer planet, interesting patterns evolve. Each planetary pairing has its own unique dance rhythm. For example, the Earth-Venus dance returns to the original starting position after eight Earth years. Eight Earth years equals thirteen Venus years. Note that 8 and 13 are members of the Fibonacci number series.

Earth: 8 years \* 365.256 days/year = 2,922.05 days

Venus: 13 years \* 224.701 days/year = 2,921.11 days (ie. 99.9%)

Watching the Earth-Venus dance for eight years creates this beautiful five-petal flower with the Sun at the center. (5 is another Fibonacci number.)

# The Earth - Venus Bond

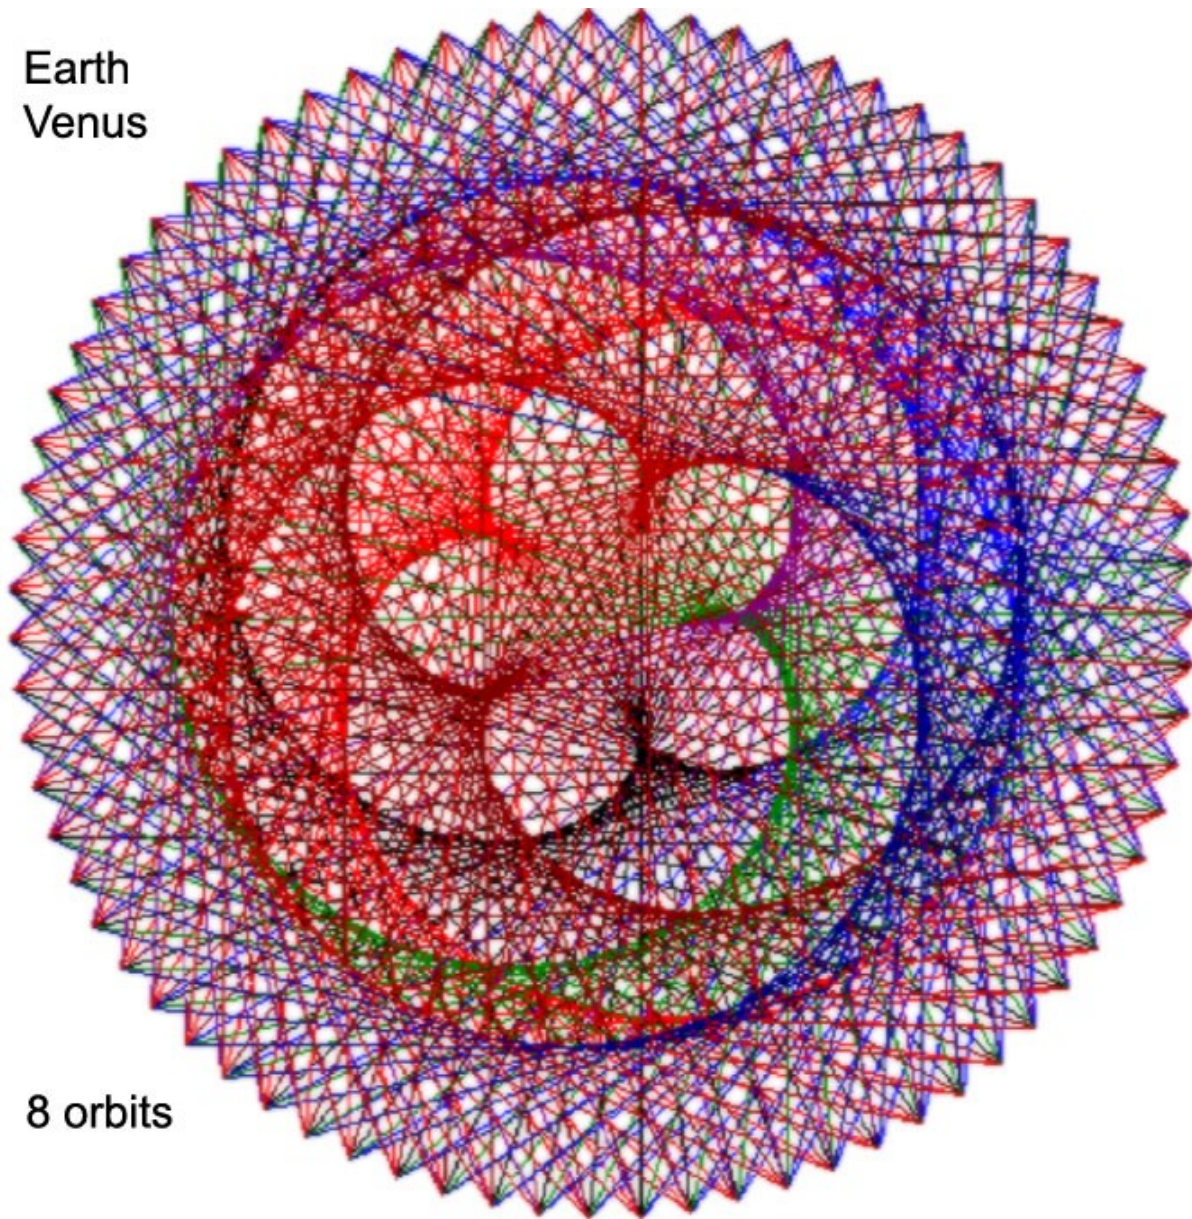

- 3. "Light comes through Venus who receives a triple supply and gives one-third to the Earth.
  - a. Therefore the two are called 'twin sisters.'
  - b. The spirit of the Earth is subservient to Venus." (S.D. II. 33.)
- 4. "Venus is the most occult, powerful and mysterious of all the planets.
  - a. Its relation with the Earth is the most prominent.
  - b. It presides over the natural generation of men.
  - c. It is called the 'other sun.'
  - d. It is the Earth's primary or spiritual prototype." (S.D. II. 33-35.)
- 5. "The planetary Logos of Venus loved the Earth so well that He incarnated and gave it perfect laws which were disregarded and rejected." (S.D. II. 38.)

# Venus and the 5 – pointed star

From the next image we can clearly discern a five pointed star emerging from the progressive series of triangulation of the earth and venus as they orbit the sun. If this progressive series of triangles were animated and viewed in 4<sup>th</sup> dimension we could also sense the rudimentary emergence or idea of the vortex and the sphere and not just a number of single or separate geometric triangles.

Are these physical movements of the planetary lives or bodies and the geometric patterns they create at random or do they potentially reflect the etheric forces that reside on hidden and interior levels that are not so easily discernable.

# Venus and the Buddhic plane

- 11. "There is a psychic link between the planetary Logos of Venus and that of our Earth.
  - a. The Venus scheme is more active than ours.
  - b. Its humanity are more advanced than ours.
  - c. Its radiation includes the buddhic plane as far as its humanity are concerned.
  - d. It could therefore open up, through stimulation, the same plane to our Earth humanity." (C.F. 367.)
- 12. "Venus is the second or the sixth scheme, according to whether the schemes are counted mystically or occultly." (C.F. 595.)

# NASA's alert on change in Sun's power

“When NASA researchers talk about a sudden change inside the Sun, they are pointing to shifts in the magnetic fields and plasma flows that power its activity cycle... In a recent briefing highlighted in [The New NASA Warning About a Sudden Change Inside The Sun](#), scientists described “unusual patterns” in the solar interior that are feeding more frequent and energetic outbursts than they have recorded in recent years. I read that as a sign that the Sun’s magnetic dynamo, the churning process that flips its polarity and drives sunspots, is moving into a more excitable state faster than models had projected.”
